

## Customer Carbon Footprint Tool

Jun 2022 - Aug 2022

### Your carbon emissions summary

Compares your carbon emissions with on-premises computing equivalents

**0.0** MTCO<sub>2</sub>e

Your estimated AWS emissions

**0.0** MTCO<sub>2</sub>e

Your emissions saved on AWS

### Your emission savings

**0.0** MTCO<sub>2</sub>e

Saved from AWS renewable energy purchases

**0.0** MTCO<sub>2</sub>e

Saved by using AWS computing services

### Your emissions by geography

**You don't have any carbon emissions for this time period.**

### Your emissions by services

Service	Carbon emissions	%
Total	0.0 MTCO <sub>2</sub> e	100%

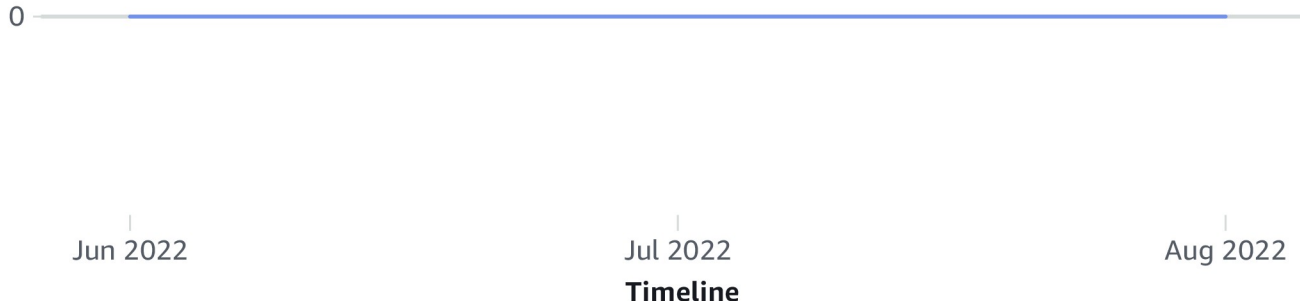

### Your AWS carbon emission statistics

Month

Quarter

Year

### Carbon emissions (MTCO2e)

### Path to 100% renewable energy

Based on your current AWS usage, this chart represents projected changes in your yearly emissions as AWS works toward its goal of powering our operations with 100% renewable energy. Note: The date range you choose in the previous section doesn't impact the chart results.
